

Building Upon a Trusted Relationship

Covenir Delivers Speed to Value to Buckeye Insurance by Expanding Insuresoft Relationship to BPO

For insurers, finding a BPO partner can be a strenuous, time-consuming process. This important piece of the business needs to be completed by a partner you can trust, has the right systems in place, efficient operations, and who utilizes insurance experts to facilitate the processes. Building upon the relationship with Insuresoft, Buckeye was able to expedite the vetting process by selecting Insuresoft's trusted partner Covenir.

Outsourcing Print. Reducing Costs.

Buckeye Insurance, a longstanding Insuresoft client for core system processing, leveraged Covenir to reduce BPO costs, increase speed of delivery, and gain efficiencies. Buckeye approached Insuresoft's partner, Covenir in spring of 2017 when they realized that BPO costs were exceeding the value of having print operations managed internally. Through outsourcing BPO, Buckeye could eliminate print equipment costs, reduce office floor space requirements, take advantage of Covenir's bulk volumes for inventory purchases and our bulk pre-sort postage rates.
